VISALIA LIVESTOCK MARKET

Dear Friends and Valued Customers,

It's hard to believe that a year has already gone by and we are welcoming you to our 30th Annual Cattlemen's Select Bull Sale. 2024 marks my 30th year here at Visalia Livestock Market. When you say 30 years, it seems like such a long time but in reality, it seems like it has gone by in a blink of an eye. These past 30 years a lot has happened I married my wife, I had two daughters, who I am immensely proud of; and for 15 years of the 30, I simultaneously managed two livestock markets. And ultimately, I developed countless relationships with some truly great people in the cattle business. For all of you who are attending today I would personally like to say thank you – thank you for being part of my life, thank you for depending on me to provide the opportunity to buy good bulls to complement your herd. As I have said before, I hold a lot of value in running good bulls with your cows in order to produce great calves.

The old saying, "That you get what you pay for," rings true with cattle as well as most things in life. A good bull should throw a quality calf and, in the end, will hopefully mean more dollars in your pocket! Unlike other consignment sales, we take pride in hand picking each bull. Not only do I travel to see the bulls, I pick them by scouring over their numbers to make sure they check the boxes for you the producer. With that said, I am also picking bulls to fit different price ranges so everyone can get an opportunity to buy a bull that suits their program. I am pretty excited about this year's offering. We have some phenomenal bulls to sell and I look forward to seeing the calf crop they produce.

As always, I would like to thank my crew for putting in the extra hours to make this event possible and the Tulare Co. CattleWomen for serving a great lunch. Also, a big thank you to Natalie Koopmann of Zoetis for sponsoring the custom Cactus saddle that will go to the one lucky buyer at the conclusion of the sale.

If you have any questions or concerns, please do not hesitate to contact me. I am available 24/7/365. Marketing cattle is and will continue to be my passion, and for you I pledge the desire to work hard to bring you the returns that you deserve. On behalf of my family – and my VLM crew – thank you for being here!

Let's have an auction!

– Randy Baxley, 559-906-9760

RED ANGUS GUIDE TO EPDS

- HB** – HerdBuilder is a maternally focused selection index that predicts the probability of developing profitable cowherd traits while maximizing the value of marketed progeny. Expressed as dollars per cow exposure, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained, and all remaining progeny are marketed on a quality-based carcass grid. (Index/High Value)
- GM** – GridMaster is a terminally focused selection index that predicts the probability to increase the value of marketed calves. GM places selection pressure on growth, feedyard performance and carcass quality, predicting differences in profit as expressed per cow exposure. GM is calculated based on the scenario that bulls are mated to cows only, and all progeny are marketed on a quality-based carcass grid. (Index/High Value)
- CED** – Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)
- BW** – Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)
- WW** – Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)
- YW** – Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)
- ADG** – Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)
- DMI** – Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)
- MILK** – Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)
- HPG** – Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)
- CEM** – Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)
- STAY** – Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)
- MARB** – Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)
- YG** – Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)
- CW** – Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)
- REA** – Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)
- FAT** – Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

Ranch Tested. Rancher Trusted.

TOUGH ON TOUGH WORMS, EASY ON CATTLE PRODUCERS.

VALCOR[®]
(doramectin and levamisole injection)

You can achieve effective parasite control in one product, where before you may have needed two. Valcor (*doramectin and levamisole injection*) is the first prescription cattle dewormer with two active ingredients in one dose. It's never been easier to be tough. Get tough at ValcorTough.com.

IMPORTANT SAFETY INFORMATION: Do not treat cattle with Valcor within 15 days of slaughter. Not for use in female dairy cattle 20 months of age or older, including dry dairy cows; not for use in beef calves less than 2 months of age, dairy calves, and veal calves. Safety has not been evaluated in breeding bulls. Use with caution in cattle treated with cholinesterase inhibitors. This product is likely to cause injection site swelling; tissue damage (including granulomas and necrosis) may occur. These reactions have resolved without treatment. See Brief Summary of Full Prescribing Information on the next page.
